

Dear CIF Research Team,

I am writing to express my strong interest in the Junior Researcher (or Researcher) position at Curatio International Foundation. With a solid academic background in Economics, hands-on experience in data analysis, and a strong commitment to impactful, evidence-based research, I am excited about the opportunity to contribute to CIF's mission of improving health outcomes through policy-relevant research.

During my studies, internships, and data-science career I have worked extensively with large-scale datasets, applying statistical and machine learning methods. My proficiency in python and spark allows me to manage complex data workflows from data cleaning and transformation to model implementation and visualization.

Beyond technical capabilities, I bring strong writing and communication skills and have experience extracting analytical insights into clear narratives for both technical and non-technical audiences. I am particularly drawn to CIF's interdisciplinary, collaborative environment and its engagement in both national and international health systems research. I am also eager to contribute to proposal writing and donor engagement processes, drawing from my growing interest in fundraising and research sustainability.

I would be honored to join CIF's team in producing high-impact research that informs public policy and advances health equity. I am available for both part- and full-time work as needed and am eager to collaborate closely with your Tbilisi-based team.

Thank you for considering my application. I have attached my CV and a writing sample as requested, and I look forward to the opportunity to further discuss how my skills and interests align with CIF's work.

Kind regards,  
Ketevan Matchavariani
